

Our Mission

The mission of the Town of Mineral is to protect, maintain and enhance the sense of community, historical heritage and charm of central Virginia small town living in the context of growth and progress.

It is on this rich mining history the Town of Mineral has, over time and in layers, built an identity and sense of community character. Preservation of this history and charm is paramount.

We aim to equip our residents and the businesses in our town with information, resources and services to experience the town's quality of life. Through the preservation and maintenance of our shared spaces, rural spaces and through Town centered growth, the Town of Mineral aims to maintain its charming character as it makes way for progress.

We invite residents and businesses to participate in local government by applying to sit on a committee or commission.
